Nitrox[™]

Work harder. That's what you demand of yourself. That's what you should demand of your nutritional supplements. Sci-Fit Nitrox is a pharmaceutically-formulated nitric oxide vasodilator with a patented time-release delivery system. Nitrox absorbs faster and stays in your bloodstream longer than ordinary vasodilators. So, instead of a brief flush, you get a sustained increase in blood and oxygen volume to your muscle. In short, quicker response and a longer-lasting pump. And since Nitrox is a soft gel cap, it's easier to swallow, easier to digest and easier on your stomach than tablet forms of nitric oxide.

Though the science behind Nitrox is critical to us, we know the results are what matter most to you. Nitrox gives you increased stamina and strength, fuller muscle volume, reduced recovery time and enhanced deep-tissue muscle stimulation. Combine Nitrox with Sci-Fit Kre-Alkalyn[®] or Creatine Infusion[™], and you'll get pro-hormone-like results. Kre-Alkalyn and Nitrox are the strongest, safest, legal anabolic compounds available.

If you're using a typical tablet formula vasodilator, it could be selling you short. Sci-Fit Nitrox delivers all-day performance for a longer-lasting pump. Sci-Fit Nitrox. Working hard is in your blood.

PURE SCIENCE. PURE GENIUS.
